Communication and collaboration

- The ways in which we communicate and collaborate have changed dramatically in recent years
- Changes have profound implications for teaching and learning
- Let us embrace the rich new learning opportunities these changes provide

Aqua-tnet 3

- Establish a network of (pedagogical) conversations between academia, industry and other stakeholders with a commitment to find
 - What new and innovative forms for communication and collaboration can we develop together?
 - What new learning opportunities can we envision and embrace?
- Common commitment to identify and carryout pilot trials for new and innovative methods for communication and collaboration
