Aqua-tnet is the European Thematic Network in the field of aquaculture, fisheries and aquatic resource management. The network is funded from 2008-2011 by the European Commission, Lifelong Learning Programme.

Set up in 1996 as a tightly-knit collaboration of university departments and research institutes, Aqua-tnet's ground-breaking work in educational reforms led to a steady expansion and by 2005 it had become the largest multidisciplinary European Education Network in the field of aquaculture, fisheries and aquatic resources management. Aqua-tnet continues its leading co-operative role between higher education institutions and other partners such as academic organisations, research institutions and industry, aiming to enhance quality and to define and develop a European dimension within its academic disciplines.

Its multi-faceted approach has enabled Aqua-tnet to make a real contribution to uniting academic and vocational aspects of the Bologna reforms, aiming for greater compatibility and comparability of the systems of higher education in Europe.
