## **SUMMARY:**

### **Objectives:**

Building on the outcomes of the sector-wide review of student associations and organizations (D6.7), WP6 will identify other students, societies and organizations from European countries with national and regional importance in order to improve student stakeholder coverage.

### **Rationale:**

For this deliverable an iterative process of survey will be implemented where the growing database of European aquaculture student associations will be queried for input on other existing associations.

### **Results:**

A survey form was drafted (see attached below) and recurrently circulated among existing members and new members. Responses will be used to update and expand the database.

Although the responses were rather few, the procedure is now established and will continue to be used to maintain the database up-to-date and complete.

## Database entries: national and regional stakeholder representations

Name of EAS-SG member: *Put your name here*

National Coordinator: *yes/no*

Location: *City and university/institution*

Country: *Country according to the database entry*

Blank form for a database entry:

<b>Name of the representaions</b>	<i>Name</i>
<b>Field</b>	<i>Which field does the representation cover (aquaculture, agriculture etc)?</i>
<b>Coverage</b>	<i>Is the organization covering on a university level or is it a nation-wide group? Please specify</i>
